it's so difficult to express how much i love you Kajiura-sama, there are so much emotions invoved with you in my mind and in my heart through all this time i've been a fan of you, you're a very important part in my life 'cos it's not a coincidence that since i started to listen to your beautiful music i felt a inexplicable connection with you and your feelings contained in every piece of every song you've created. In every moment i've been sad and happy you have been there with me by my side, and that is something priceless to me, so that's why i want to expand your creation to every corner of this world, especially in Latin America where is my home. I promise to you that i'll do my best to be the spanish-speaking referent of YOU and your work. Thank you so much my dear Yuki, although you can't see me i'll always be by your side and you will always be in my heart.
Tanjoubi omedeto!!!!!!!!!!

Happy birthday! I wish for all the light of the sun, the moon and the stars to come down to reside in You. Thank You for all you do, as well as for simply existing!

Be blessed throughout the universe, entire,
In tune with it, as that's Your gift and wealth -
Its magic to inspire,
Transparent hands of Poetry herself
To play Your lyre.

To YUKI SAMA: First of all, Happy birthday to you ~ Yeah, I really want to send my wish to you because I am a fan of you. I am a 18-year-old girl who lives in Shanghai, China. My English is not very good but I can't write in Japanese at all, so this is the only way I can communicate with you and send my wish and admiration to you. I am not sure if I can tell you my feeling about your music in English as well as in Chinese, but I will try my best to do it. I became to know your music because of one of your famous songs——Akatsuki no kuruma. Three years ago, my sister sent the song to me. I listened to it and I can't help being attracted by its beautiful melody. Cello and guitar are so Yasashii. YUUKA's voice is sweet. I had never listened to such kind of music. You mix pop with Classic. You add violin to electronic music. Before listening to your music, my favorite kind of music is classic. My favorite composer is MOZART because of his beautiful and delicate melody which is like sunshine. I don't like pop music at all. But your music let me know that the melody played by violin and electronic music, the music mixed with pop and classic is more beautiful and exciting than the melody only played by violin. Because of your music, I decided to learn how to play the violin. My desire now is playing your music by violin. But now I have to study hard to prepare for my countless examinations, so sadly, I have no time to do so. But luckily, I can play the piano. I always play your music during the rest time. Playing the music written by you, I feel relaxed. But it is really difficult to find the music sheet, so I can only play a part of them. I have also found many other things in your music, such as love, soul and imagination. Melody is just melody. Only when it contains composer's love, soul and imagination can it be called music. And I think that's the reason why your music can move me. I have collected almost all your music such as NOIR OST, MADLAX OST, hack//SIGN OST and so on. I can't say which is my favorite because all of them are so excellent. But if someone forces me to say one, I will say Akatsuki no kuruma without hesitation just because it is the beginning of my way to your music world, just because of the hope its melody and words bring to me, just because if there is no Akatsuki no kuruma , perhaps I won't know there is so outstanding a composer in the world named Kajiura Yuki .I really love you and your music. I am proud to say ——It's my favorite and you are my favorite~ Finally, I want to say: please.....please keep on fighting, I will support you forever!

PS: Your latest song 砂塵の彼方へ... is also very beautiful. I listen to it almost every day. Another dream of mine is to attend your concert in shanghai. Come here~ come to China please~ All of your Chinese fans and I are waiting for you Happy Birthday to you~ YUKI SAMA!

Hi, and Happy Birthday! I'd like to say thank you, for composing such wonderful and inspirational music. You're truly my favourite composer, and I'm really happy to have been able to listen to your pieces. Your instrumentation and vocals are so unique and complex; it's amazing to try to pick out all the details. And your beautiful violin solos have even given me the motivation to try learning the violin. :) I eagerly anticipate hearing more of your works. Thank you so much.
